

Like We Never Loved At All (feat. Faith Hill)

Tim McGraw

(feat. Faith Hill) You never looked so good

As you did last night

Underneath those city lights

There walking with your friend

Laughing at the moon

I swear you looked right through me

But I'm still living with your goodbye

And you're just going on with your life

(chorus)

How can you just walk on by

Without one tear in your eye

Don't you have the slightest feelings left for me

Maybe that's just your way

Of dealing with the pain

Forgetting everything between our rise and fall

Like we never loved at all You, I hear you're doing fine

Seems like you're doing well

As far as I can tell

Time is leaving us behind

Another week has passed

And still I haven't laughed yet

So tell me what your secret is

To letting go like you did, like you did (chorus)

Did you forget the magic

Did you forget the passion

Did you ever miss me

Ever long to kiss me (chorus) You, you never looked so good
