

# India

## Will Bates & Phil Mossman

I got the biggest part of heaven in my life  
And I can feel it every time I see your eyes

You're my world, you're my light

India

If I could, you know I'd open every door

But your own journey makes it mean so much more

I believe in all your dreams

India

Down, you'll never let me down

When you follow your own way

Speak the words only you would say

Keep reaching for your star

It won't be far

When love's behind you

You're the miracle of life that love has made

This bond between the two of us will never break

Your flower blooms, I sing for you

India

You hold the universe inside your little hands

So don't you listen if they just don't understand you

When you try, you always fly

India

Yes, baby

Keep reaching for your star

If won't be far

I'm right behind you

You, yeah

I got the biggest part of heaven in my life

And I can feel it every time I see your eyes

You're my world, you're my light

India

I believe in all your dreams

India

When you try, you always fly

India, yes, you do, baby
