Cold Black Days

Atrocity

Get away and your life will be released
Give away all your dreams and all your sinsYou are praying for forgiveness, you cry for help
When your life is over who can tell
You can't change anything, your life is just a dream
Nothing real, nothing more, nothing earned causeThese are cold black days and you're fading away
Like cold dark nights and you're longing for light
These are cold days and you're running away
To be alive again
To be alive againLook around emptiness and you are falling
Hear the sound, the peal of bells is tolling
You remember sunny days, these times are gone
All the lovely words are said and done
You can't change all the things, your life is full of dreams
Nothing real nothing more, nothing earned causeThese are cold black days and you're fading away
Like cold dark nights and you're longing for light
These are cold days and you're running away
To be alive again
To be alive againCold black days
Cold black daysThese are cold black daysThese are cold black days and you're fading away
Like cold dark nights and you're longing for light
These are cold days and you're running away
To be alive again
To be alive againThese are cold black days and you're fading away
Like cold dark nights and you're longing for light
These are cold days and you're running away
To be alive again
To be alive again
