

When Will It Rain

Extreme

No one ever sees you cry
You just keep it all inside
In a warm place, where you can hide
When will it rain
When will it rain
I saw you laugh the other day
But all too fast it went away
Now your sky's cloudy 'n' gray
Falling mainly on the plain
When will it rain
When will it rain
No water fallls
Down your window pane
And when I look into your eyes

That window to your soul can't lie
There's water where the well went dry
So how long can there be a drought
When your dam's filled with doubt
No place to build your house
Let your cup runneth over and out
I said for crying out loud
When will it rain
When will it rain
No water fallls
Down your window pane
When will it rain
When will it rain
A tear for fear is calling out your name
Rain on me
