Go Outside

The Jones Orchestra

I really want to go out
I really want to go outside and stop to see your day
You really want to hole up
You really want to stay inside and sleep the light awayI really want to go out
I really want to go outside and make it light all day
You really want to hole up
You really want to stay inside and not care where you layWell I know what's good
Exactly cause I have been there before
Yeah I know what's good
Exactly those things night cannot beholdI really want to go out
I really want to go outside and stop to see your day
You really want to hole up
You really want to stay inside and sleep the light awayI think it's good to go out
cause if you don't you'll never make a memory that will stay
I think that you should wake up
I think I want to live my life and you're just in my way
