How Could You

Anita Baker

It's right, it's real baby, it's true
Yeah the sun and the moon
Revolve around only you
And the magic that you do
How could I be blue, not around you
Always on my mind, I need you baby
Darling would you mind if I hold on tight
And love you for the rest of my life?
Honey how could you love me?
How could you love me like this?
I said I never knew just what I missed
How could you love me like this?
You're part of my heart
You're almost close as my skin
Baby where have you been all my life?
I said it's alright, it feels just like my dreams
Only now that I got the real thing yea yea

Always on my mind, I need you baby
Darling would you mind if I hold tight
And love you for the rest of my life?
Honey how could you love me?
How could you love me like this?
I said I never knew just what I missed
How could you love me like this?
And it gets sweeter
Sweeter as the days go by
And it gets better
It keeps getting better baby
Better with time
And time, babe, oh baby
Yes love me like this
I said I never I never I never knew
Baby never
