

# Space Sonic

## Ellegarden

Insane

I feel ashamed when the morning comes

And I hate to breathe

Guilty

No doubt I am

Please tell me how to come clean again

Spaceship

Go fuck the stars

When the night falls down they shine on me

Have you ever felt this way

Like you are the worst mankind on the planet earth

Don't even ask why I'm standing here

I found a piece of me

It is still left in you

It's very cheap but cute emotion

I wish you were here'Cause I found the way to live with that

I'm not going anywhere

I thought you'd only make me weak

That's wrong

I knew it all and you knew it all

that it's never gonna work

To wait for someone who could stop this rain

It just rains

Watching

The same old dream

A mailing car runs over me

Have you ever felt this way

Like you are the most useless on the planet earth

Don't even ask why I'm standing here

I found the shiners of my own

A fantasy

Good memories

It's very cheap but cute emotion

I with you were here'Cause I found the way to live with that

I'm not going anywhere

I thought you'd only make me weak

That's wrong

I knew it all and you knew it all

that it's never gonna work

To wait for someone who could stop this rain

It just rains

It just rains

Maybe there's no one who is perfect

But who wants to be anyway

Maybe there's no one who is all clean

But who wants to be anyway'Cause I found the way to live with that  
I'm not going anywhere  
I thought you'd only make me weak  
That's wrong  
I knew it all and you knew it all  
that it's never gonna work  
To wait for someone who could stop this rain  
It just rains
