

# Venus

## Classic Case

when i caught you making plans for a new life  
you were pale and out of breath but of sound mind  
then you told me about the place where the stars align  
you were staging and escape from my empire set a course for venus and leave earth now  
we should leave this world forever  
set a course for venus and leave earth now  
we should leave this world together there's a beacon sending signs from the lighthouse  
will you dare to make your way through the barbed wire?  
be prepared when you reveal what the scars hide  
you'll be dead to me i swear if you walk out set a course for venus and leave earth now  
we should leave this world forever  
set a course for venus and leave earth now  
we should leave this world together
