

Get It Together

The Design

Starry eyes
You're looking up too high
To the skies
Before you learn to fly
Lie to yourself
And no one's gonna notice you
No one is going to notice you
Get it together
We're gonna get better with every step
Step we take
Get it together
We're gonna get better with every step
Step we take
Get it together
We're gonna get better with every step
Step we take
Get it together
We're gonna get better with every step
Step we take
Even as you're ascending
You feel as though you're losing control
What's your roll?
Kamikaze demons will pick at the cracks exposed
I never said it was an easy road
Get it together
We're gonna get better with every step
Step we take
Get it together
We're gonna get better with every step
Step we take
Get it together
We're gonna get better with every step
Step we take
Get it together
We're gonna get better with every step
Step we take
Why don't you reach in
To begin?
Get it together
We're gonna get better with every step
Step we take
Get it together
We're gonna get better with every step
Step we take

Get it together
We're gonna get better with every step
Step we take
Get it together
We're gonna get better with every step
Step we take
