Lost In A Contraption

Cky

I was lost in a contraption
Took me days to find direction
Suddenly the moments collide
Finally found the fault in father
Family blood dilutes the water
I was dazed in my direction tonight
Photographed when he hit the ground
No one minds
That's my blind side

I was lost and you're to blame
A man of doubt gave me a name
The obvious was too hard to find
To watch me try is out of line
The sun will shine
To watch me die
Is out of line
The sun will still shine
What's mine is mine
The sun will still shine
