Careful What You Wish For

Testament

Grace in a perfect world
On shines the light
Praise an angelic song
But there's another side you'll seeNow hide
Salvation easily deniedReigns down with misery
Life's not always what it seemsFalse hope
Written in the testament of old
Take heed
Stop believin' every word you readTruth inconsistencies
Distorts the lies
False imprisonments
Forever lost inside your mindFate's door
Just be careful what you wish for
Death's door
Just be careful what you wish forPeace of mind I can't find
Don't be blind take the rideHey, we live in a fucked up world
Walkin' on through the demise
We step into the unknown
Your better save yourselfHey, we live in a fucked up world
Hidin' behind the disguise
Never let your feelings show
Why can't you be yourself?We live in a fucked up world
Walkin' on through the demise
We step into the unknown
Your better save yourself
