

Something Real

[Randy Houser](#)

I never was all that good at bein' with one woman
I never was all that bad at bein' a good man
I use to think my time was precious and best spent runnin'
And I've had to put a million miles behind me to help me understand
That what I really want, what I've waited
on is something real
There's a missin' part that my empty heart can't fill
Oh, I know she's out there somewhere now
I know she's meant for me somehow
The one and only one that makes me feel something real
I always thought I'd know her when I saw her
But I guess I'm just a dreamer
And waitin' for the girl I can't just be with
I want the one I can't be without, no I won't live without
What I really want, what I've waited on is something
real
There's a missin' part that my empty heart can't fill
I know she's out there somewhere now
I know she's meant for me somehow
The one and only one that makes me feel something real
Oh, I know you're out there somewhere now
I know you're meant for me somehow
The one and only one that makes me feel something real
