It Came From Japan

The Von Bondies

Put away your cigarettes
And your high class attitude
Turn emotion to devotion
Baby I can see it in you too
We all hail hail from rock and roll
From behind a glass case
We all hail hail from rock and roll
From behind a glass case
Put away your cigarettes
And your high class attitude
Turn emotion to devotion
Baby I can see it in you too
We all hail hail from rock and roll
From behind a glass case

We all hail hail from rock and roll
From behind a glass case
Put away your cigarettes
And your high class attitude
Turn emotion to devotion
Baby I can see it in you too
We all hail hail from rock and roll
From behind a glass case
We all hail hail from rock and roll
From behind a glass case
From behind a glass case
From behind a glass case
