

# Built In Girls

## Wrens

sweet pretty things set out in motion  
painted to doll and sleek with grace  
the city has no real need to be nervous it 's seen it all before  
measured out life in lipstick and lashes  
it 's easy when you 've been given such charms  
tease a little smile, pull back your hair  
toss around, walk around, act like you care  
it 's built in girls so naturally  
built in girls and it 's all that they 'll ever need  
just turn around and tell me you love me  
spit out the words that you 'll make sincere  
there is no time for decisions or countless revisions  
i 've heard them all before  
so don 't pretend to be so true when you got him coming through  
when everything you wanted has turned to nothing more  
don 't say i never warned you, it 's well known  
something has been happening here for years  
i 'm not worried i can always come back crawling to you  
begging for forgiveness in the honest degrees  
talking through some circles with the greatest of ease  
these are the assumptions and these are the times
