

Overloved

Paula Deanda

I need to find somebody who can't sleep at night
Without holdin' me, without holdin' me tight
I want someone who sees me all the time in their dreams
And then wakes up thinkin' just of me
Spent time on my own
Spent time being free
Now I just wanna be
Overloved
Over needed
Over wanted
Over missed when I'm away
Overloved
Over dreamed of
Over cared about
Over everything
I'd give anything to be overloved
I want someone who can't wait to kiss me again
Even though it's been a minute since they last did
Want someone who loves love songs
And dedicates them to me
And two loving arms never out of reach
Been fine all alone
Did fine being free
This time I wanna be
This time I wanna be
Overloved
Over needed
Over wanted
Over missed when I'm away
Overloved
Over dreamed of
Over cared about
Over everything
I'd give anything to be overloved
Want someone to talk to me with talk so sweet
Want someone who's there to share their world with me
Oh baby, I've been too lonely for too many nights
This time I need someone here in my life
This time I want someone holdin' me tight
Been under kissed, under touched
Now I just wanna be
Overloved
Over needed
Over wanted
Over missed when I'm away
Overloved
Over dreamed of
Over cared about
Over everything
I'd give anything to be overloved
I just wanna be

By someone who's over in love with me
Over kissed, over touched
Over missed
Overloved
