SV

Urban organic, mic mechanic

Super human MC powers help me fly around the planet

Touch the Microphone device, whole countries get flattened

Saving damsels in distress so young girls don't panic Putting MCs under pressure till they crack like ceramic

Always thought they could flow but sink like the Titanic

Rhymes rip through your skull like icebergs through the hull

Survive the impact, and arctic cold freezes your soul Create a new style, then break the mold

Compositions are controlled, and liable to explode

Like land mines, my crew blows through like wind chimes

Make it hot like fire, 200 proof like Moonshine Risky, playing yourself is risky, and the flows mad jazzy

Like dizzy Gillespe and the sound be harmonious and deadly

Like a harpy call either break one like Wayne Gretzky

No man can test me, so why try?, focus like a samurai

Stronger than a maitai or a tsunami I mean tsunami

I rock it from MTV, to the BBC Radioactive waves short out your TV

LESB check it for me in the next galaxy

Put it in a time capsule till the next century

In a black out use it for electricity Danger, high voltage don't feed me their daily dosage

I break it down mathematically, 99.9 is a percentage

Like closing fine wine the rhymes are vintage

And the universal will gives me strength like spinach With dinage, I eat it like a Tofu sandwich

With cabbage, I ask your girl, she knows that

I'm not the average nigga who plays to pull the trigga'

Reality's the root of the rhymes that I configure Phony Baloney, swear like Don Corleone

But when shit hit the fan they start crying like pretty Tony

Tender like Roni but wish to be bad like Bobby

Been there, done that, smashed up talkin' rhymes is my hobby You're probably, like, what's he on

'Cause I rock it from the start, till the beat is gone

Not in the mafia but I'm the Microphone Don

And the words that I shoot out my mouth are Teflon Jeru never touch ya, Microphone wrecka'

Meet out in the stretcha' step up in my center

Try to match wits but the mentor will crush you
Jeru the Damager, the suntoucher please Yeah this is it right here on, always down
