I Want You Back

Hoodoo Gurus

I can still recall the time
She said she was always mine
Then she left
(As people do)
And forgets what we've been through
(Does this sound familiar to you?)It's not that she's gone away
It's the things I hear she has got to say
About me and about my friends
When we've got no defenseThat's her, I'll never believe her again.
She might have deceived all my friends
I know they will see in the end
What it all means when she says
(Yeah)
I want you back
(She says)But what's worse, she thinks it's true
But that's just her
(She always was a little bit confused)
She's not worth the time I had to lose
