

Comedy of Errors

Alesana

I've been here before am I losing my mind?
Look at me, tell me I'm crazy
We're in danger
Follow me and you'll see things are not what they seem
Take my hand or don't you trust me?
We are in danger and I'm the one to blame
At the edge of man's reason there exist designs to escape reality
The tesseract calls to me
Cosmic strings shall be mine to pull
Failure met by failure
Try again! Try again!
Still she calls to me... Can I hold you closer and drown in your dreams?
I promise fantasies can be more than words that we have buried alive
The nightmare is real still I pray and beg for more
I'm never closing my eyes
Forever one with the night Hush sweet baby don't say a word
I'm ignoring destiny for reasons I can't tell you
We try to fool our minds
How long do we wait for salvation?
Is it a sin to wonder?
Get off your knees! Failure met by failure
Try again! Try again!
She's insane!
Can I hold you closer and drown in your dreams?
I promise fantasies can be more than words that we have buried alive
The nightmare is real still I pray and beg for more
I'm never closing my eyes
Forever one with the night Can you hear me? Someone's talking
Can you see me? Someone's watching
Delusions of grandeur, where the hell am I? Save me from myself!
'cause I can no longer play this morbid game
Just when I thought it was over, here we go!
Galaxies welcome me inside! I'm insane!
Oh the horror! Oh the panic!
Paranoid and deranged! I am a God!
Psychotic and ashamed! Why! Why!
Can you hear me? Can you see me? Can I hold you closer and drown in your dreams?
I promise fantasies can be more than words that we have buried alive
The nightmare is real still I pray and beg for more
I'm never closing my eyes

Forever one with the night
I'm never closing my eyes
Forever one with the night It was a dark and stormy night...
I've traveled near and far, raced with all the stars
now alone I'll be, subtle tragedy
If I had one more chance to just explore
I would take your hand and do it all again
