Need

Blinded Colony

It's broken again, it's broken again
always the same as no one gains
when everything is perfect
it's all manufactured with a defectAnd since they can live on us we live through them
yes we live through themThey're making us needing them in a physical way
they're making us needing them in a mental wayNow rebellion ain't no longer old
che's face on children's clothesMake us never stop needing more
make us never feel self-assured, 'cos we ain't for sureAnd since they can live on us we live through themI am
perfect when naked and unleashedThey're making us needing them in a physical way
they're making us needing them in a mental wayFuck that bloody idea
take a culture and sell it expensiveIt's all so calculated, it's all so calculated
with perfection it gets so complicatedIt's broken again, it's broken again!
always the same as no one gainsAnd since they can live on us we live through them
yes we live through themThey're making us needing them in a physical way
they're making us needing them in a mental way
