

# Need

## Blinded Colony

It's broken again, it's broken again  
always the same as no one gains  
when everything is perfect

it's all manufactured with a defectAnd since they can live on us we live through them  
yes we live through themThey're making us needing them in a physical way  
they're making us needing them in a mental wayNow rebellion ain't no longer old  
che's face on children's clothesMake us never stop needing more

make us never feel self-assured, 'cos we ain't for sureAnd since they can live on us we live through themI am  
perfect when naked and unleashedThey're making us needing them in a physical way  
they're making us needing them in a mental wayFuck that bloody idea  
take a culture and sell it expensiveIt's all so calculated, it's all so calculated  
with perfection it gets so complicatedIt's broken again, it's broken again!  
always the same as no one gainsAnd since they can live on us we live through them  
yes we live through themThey're making us needing them in a physical way  
they're making us needing them in a mental way
