

# None of My Business

## Henson Cargill

Little kids sleepin' with rats in their bed well it's none of my business  
It's been a long time since they've been fed but it's none of my business  
Some more bad news from Vietnam and China's playin' with a great big bomb  
I better take a pill to stay dumb cause it's none of my businessPeople are afraid to walk their own streets but it's  
none of my business  
Cops can even walk on their beat but it's none of my business  
I read about a girl I forgot her name she was screamin' for help but nobody came  
It seems like kind of a shame but it's none of my businessTen more billion on a national debt well it's none of  
my business  
People in the slums are a little upset that's none of my business  
Kids gripin' out of school lookin' for a thrill learnin' the law's kill or be killed  
I better take another pill cause it's none of my businessNow the preacher's sayin' somethin' bout good man vow  
well it's none of my business  
He said we got troubles that we gotta have sow oh it's none of my business  
Now I go to church and I meditate I don't even mind when they pass the plate  
But they stuff about my fellow man's fate well 's none of my business  
(They stuff about my fellow man's fate) Lord it's none of my business
