

Sing a Song of Freedom

Cliff Richard & The Shadows

As I look around me
I see the world in a different light
Everything is changing
And it happened one night Changing for the better
And it starts with you and me
So well sing our song together and forever
We'll be free Sing a song of freedom
People together, everybody sing
Sing a song of freedom each and everyone
People come together all across the land If you're looking for an answer
It's very close in hand
Just take a look around you
And then you'll understand Clap your hands together
And let me hear the sound
It's the time for liberation
So pass the world around
