

Strangers

Liebe

Strange things coming to my way tonight
someone is missing
but i can't find
say what you say
if you're ever be in love

Two days,under the sun walking by
it's never too late for another new start
say what you say, if you ever feel alone

Cause somewhere around,there is a strange way to go
someone is telling the right way to go but who knows
i know,i know

A strange feeling got me when someone around
calling your name and the sound never told you to go
i know, i know

Strange things coming to my way tonight
someone is leaving the bar in the night
there's no returning if you 're still in love

Under the night we can stare in the sky
in to the morning we can sleep a side
there's no escaping if you're still in love

Cause somewhere around,there is a strange way to go
someone is telling the right way to go but who knows
i know, i know

A strange feeling got me when someone around
calling your name and the sound never told you to go
i know, i know
