Angel Dream

Glen Campbell

I dreamed you, I saw your face
Caught my lifeline when drifting through space
I saw an angel, I saw my fate
I can only thank God it was not too lateOver mountains I floated away
Across an ocean I dreamed her name
I followed an angel up through the gates
And I can only thank God it was not too lateSing a song of loneliness
Sing one to make me smile
Another round for everyone
I'm here for a little while, yes I amNow, Im walking this street on my own
But she's with me everywhere I go
I found an angel, I found my place
I can only thank God it was not too late
I can only thank God it was not too late
I can only thank God that its not, its not too late
