

# Don't Ever

## August Moon

Convinced you've cracked the formula, determined you will pass  
This test that life has given us, so many would like to try again  
But there you go, feeling fine, best you've ever felt in your life  
You know? Oh you know But doubt starts to whisper to you, "What the hell are you up to"?  
Fear steps in, breaking in, every part of your soul  
Wondering why you even try, if nothing seems to be going right  
You know? Chorus:  
But don't ever give into those overwhelming thoughts that haunt you  
Never say never You step outside of your life, look in through another's eyes  
What do they see? What do they think of me?  
Not only are you fighting yourself  
You're getting pushed, getting bruised by everybody else And you hear the whispers about you, "What the hell  
is he up to"?  
Fear steps in, breaking in, every part of your soul  
Wondering why you even try, if no one seems to be by your side Chorus Life's journey is not easy  
Hold on to hope and dreams  
If you do, you will be so much more Chorus
