

# You Want It

## Packy

[Hook]

You live life for that moment  
You want it girl, and I know it  
Your heart, I own it  
You want it girl and I know it  
You can't control it  
You want it girl and I know it  
You love life and live for the night and I like the fact that it's showing

[Verse 1]

I see beauty in those eyes, I know it's something  
I feel it like butterflies  
She floatin' like a microphone  
She open like "I'm here rappers"  
So she like 'em, parents hate 'em  
And she fight it  
Deep inside she really like it  
She always been a safe girl with a safe guy  
But that grass grew and that paint dry  
And got bored, can't blame her  
Nah, she want an entertainer  
Reputation- player  
She don't believe all that though  
Low key, she don't really care right now  
She don't really wanna go that slow  
Lights low at this show  
All those people out on that floor  
Don't be shy baby, it's all right  
Quit hangin' in the back row  
Let me see somethin' you got  
Let other girls into the spot  
[?]  
You don't really wanna wait around for the clock cause  
Strike midnight, then who knows  
Who knows (x3)  
Take that chance  
You might like it  
I can see that you exited

I can see the stories in your eyes and I'm like "write it all down"

[Bridge]

We could do whatever baby  
Let go of the wall and get a little closer let me drive you crazy

[Hook]

[Verse 2]

I see you with you lady friends  
I see you think it's funny how you get these men to spend their money like they with Mercedes-Benz  
Crazy and  
Your girls 9's, maybe 10's  
I don't really know though  
It all depends  
If they standin' next to you  
Girl you are the finest  
No lie  
Your highness  
I wish you would step over here and say hi  
You know I'm everything they not  
You know a little bit about me  
You wanna see that with your own eyes  
You been lookin' for the right love  
You been lookin' at the wrong guys  
Lemme try  
I know what to do  
Girl, what you think about that  
This club packed  
Lotta people waitin' out front  
What you think about leaving out back  
You down?  
Grab you 'round the waistline  
Go till we don't hear that bassline  
And we all alone  
It's our night  
Don't waste time  
It's alright  
With me (x4)  
Take that chance  
You might like it  
I can see that you exited  
I can see the stories in your eyes and I'm like "write it all down"

[Bridge + Hook]

[Verse 3]

You can't hide it from me, I can tell you like it girl  
I can see you smilin', hidin' it behind them curls  
Trust me, you don't gotta fake it, baby be yourself  
If I wasn't looking for you then I'd be with someone else  
Cut the lights in this thing  
Can't tell day and night in this thing  
Cut them phones off and then you know  
And then doze off in this thing  
Wake up in no time  
Grab hold the wine, sip slow the wine in this thing  
Girl I know the signs  
Let go the wine, it's overtime in this thing, uh  
Wake up, grab that purse  
Late to work and you rushin' out cause your girl outside waitin'  
She want to hear what the fuss about  
You walk out, walk back in  
You sexiest when you smilin'  
You look at me, and I look at you  
And we both know to keep silent like this  
You took that chance, I know you liked it  
I could see that you exited  
I could see the stories in your eyes and then I wrote it all down
