

Westwood Motor Lodge

Echo Orbiter

Any likeness that reveals those intentions
She said ?let?s go driving and turn the radio loud?
So we sped on and we watched it get further
Away from our careless minds, and we quietly anticipated

What was ahead of us
Where we would forget it all
How would the sunlight feel out there
Being that we would be closer to all things new

Waiting moment; there?s no point in putting things off longer
This time we knew there wasn?t anything to go back to

Any likeness that reveals those intentions
She said ?let?s go driving and turn the radio loud?
So we sped on and we watched it get further
Away from our careless minds, and we quietly anticipated

What was ahead of us
Where we would forget it all
How would the sunlight feel out there
Being that we would be closer to all things new

Waiting moment; there?s no point in putting things off longer
This time we knew there wasn?t anything to go back to
