True Love

Glenn Frey

Out of the blue, out of the night
You came along and you changed my life
I'm feeling things I swear I never felt before
You looked at me, that's all it took
You read my heart like an open bookWell, it was true love, right from the start
It was true love, straight from my heart
It was true love, ain't no doubt about it, baby
True love, I can't live without itBefore I met you baby, I was alone
Thought I was happy livin' on my own
But now I realize
This world was made for two, like me and you
With you by my side, everything's fine
There ain't no mountain, sugar, we can't climbWe got a true love, that's all we need
Is a true love, it's got a lifetime guarantee
It's a true love, so hard to find baby
True love, put your heart on the line nowTrue love, makes every day a little brighter
True love, makes every burden just a little lighter
True love, it'll make you be a better man
If you had true love, you'd understandOut of the blue, out of the night
You came along and you changed my life
You got me feeling things, I swear I never felt before
You lift me up, you make me strong
You give me lovin' lastin' all night longIt's a true love, right from the start
It's a true love, comin' straight from my heart
True love, need you here beside me baby
True love, need your love to guide me
True love, I can't deny this feelin' no, no matter how hard I try
True love, I just know what I feel
And it's a true loveShe's my baby, she's my girl
She changed my life, oh, she changed my world
She's my buttercup, oh, fill me up, woo yeahTalkin' about love, talkin' about love
It's gotta be a true loveTrue love
True love
True love
