

One Family

[Kelly Price](#)

Forgetting the old and starting things
Brand new the past is gone and the future's
Here for you this Christmas
The world's a little kinder too cause everybody
Observes the golden rule at Christmas Love's unconditional and we're all emotional because
Our hearts have been made new. Love's unconditional and
We're all emotional because our hearts have been made new Give thanks to God for where He's brought us from
He's given us blessings, He's given us His son this
Christmas. I want the gifts and the finer things but
I know better that love is what we need at Christmas Love's unconditional and we're all emotional because
Restorations come, Love's unconditional and we're all emotional because restorations come
Because the family is one
