Something to Do

Exit 159

give me something to sing about
not every thing you need
hey we can work it out
just you wait and see
but I don't really need this, no way
and I don't really want this anyway
I just wanna be
driving in my car
crank the radio
I don't care at all
it's something to do
lying on my back
counting all the stars
I don't care at all
it's something, something to do
get everything I want
get everything I need
so much for invitations
I'm talking to myself
talking back to me
in all these conversations
