

# Shine

## Ricky Martin

We can talk, you can make your demands  
We can cry cast the tears in our heads  
We can laugh and dance  
Under this steady moon  
And when the morning comes  
I'll still be holding you  
Shine brighter than a rain of falling stars  
Time stops to let our hearts be synchronized  
This endless night is no goodbye  
This moment will last forever,  
This moment will last forever,  
I know you would catch me  
Should I fall from grace  
If I heard you drowning in the dark  
I'd dive into the waves

We can make a vow and seal it with a kiss  
The moments that we shared will matter more  
Than those we missed  
Shine brighter than a rain of falling stars  
Time stops to let our hearts be synchronized  
This endless night is no goodbye  
This moment will last forever,  
This moment will last forever  
In another place, in another time  
In another space, in another life  
In another world you could still be mine  
We'll shine, we'll shine  
Shine, brighter than a rain of fallen stars  
Time stops to let our hearts be synchronized  
This endless night is no goodbye  
Shine brighter than a rain of falling stars  
Time stops to let our hearts be synchronized  
This endless night is no goodbye  
This moment will last forever,  
This moment will last forever.  
This moment will last forever,  
This moment will last forever.
