

# All Figured Out

## Bowling for Soup

I was the one who had shit for brains  
I never took the time to notice  
That I was always wrong and you weren't  
You were the one who gave up so many things  
Took you for granted but you understood  
It was just a phase And I've got a new direction  
A blueprint for erection of a new life  
It's such a simple situation  
Some kind of masturbation  
With a new twist  
I don't know why I've got it all figured out  
We can make it and I'll never let you down  
Just take my hand and understand  
There's a lot of tomorrows I let you down, you had no complaints  
Watched as the world went spinin'  
Around without you, you waited for me  
You wanted diamonds, I came up with Rollerblades  
Shot down again but you smiled and shook your head  
And knew that I changed And I've got a new direction  
A blueprint for erection of a new life  
It's such a simple situation  
Some kind of masturbation  
With a new twist  
I don't know why I've got it all figured out  
We can make it and I'll never let you down  
Just take my hand and understand  
There's a lot of tomorrows  
Just take my hand and understand  
There's a lot of tomorrows I was the one who had shit for brains  
I never took the time to notice  
That I was always wrong and you weren't  
You were the one who gave up so many things  
Took you for granted but you understood And I've got it all figured out  
We can make it and I'll never let you down  
Just take my hand and understand  
There's a lot of tomorrows I've got it all figured out  
We can make it and I'll never let you down  
Just take my hand and understand  
There's a lot of tomorrows I've got it all figured out

We can make it and I'll never let you down  
Just take my hand and understand  
There's a lot of tomorrows I've got it all figured out  
We can make it and I'll never let you down  
Just take my hand and understand  
There's a lot of tomorrows I've got it all figured out  
We can make it and I'll never let you down  
Just take my hand and understand  
There's a lot of tomorrows I've got it all figured out  
I've got it all figured out  
I've got it all figured out
