

Edward

Pawas

Fourteen shades to summer nights
we were shadowed by your light cause you and I were never faithful I hold you up so you can fall
you never seemed to care at all cause you and I were never faithful don't count me out, you've waited now
this needs to be the way the sun will fade I need you to feel this way
with scars outlast the pain
and nothing seems to stay the same
and you were never made that way
when all of this seemed real
just not today sober thoughts begin to go
those who waited for your fall
no one needs to feel that helpless don't count me out, you've waited now
this needs to be the way the sun will fade I need you to feel this way
with scars outlast the pain
and nothing seems to stay the same
and you were never made that way
when all of this seemed real
just not today no, the more we change our lives
with the feelings left inside
that just won't go away I need you to feel this way
with scars outlast the pain
and nothing seems to stay the same
and you were never made that way
when all of this seemed real
just not today I need you to feel this way
I need you to feel this way
I need you to feel this way
just not today
