

Love Thing

Olivia Lane

He tells me i'm pretty and i look just fine
Cracks a couple jokes and then i smile
And we talk and we laugh and we go through the same routine
Pays my tab and walks me home
Goodnight kiss then i watch him go
It was good, it was great, he was nice, but it was all plain jane
I can't help but ask, why i'm bored with that
Give me a roller coaster, ride up and down all over
Shoot me into outer space, let's dance around the sun all day
Cause normal is overrated, i want fun and complicated
Let's go back to seventh grade, had a crush but couldn't say
What we want to, that three word, four letter love thing
Yeah, that love thing

John and June, they lived next door together since 1944
And they sit and they kiss on their porch like it's the very first time
I'd ask them what the secret was, he said there's no stopping love
She would run, he would chase, he fell fast and she caved
All he could say was
Give me a roller coaster, ride up and down all over
Shoot me into outer space, let's dance around the sun all day
Cause normal is overrated, i want fun and complicated
let's go back to seventh grade, had a crush but couldn't say
What we want to, that three word, four letter love thing
I can't help but ask, why?

Give me a roller coaster, ride up and down all over
Shoot me into outer space, let's dance around the sun all day
Cause normal is overrated, i want fun and complicated
Let's go back to seventh grade, had a crush but couldn't say
What we want to, what we want to
That three word, four letter love thing
Yeah, that love thing
