

# I Wanna Be There

## Anuheia

Won't you let me catch your fall?  
Won't you let me lend a hand?  
Those lonely eyes have seen it all  
But love's too blind to understand 'Cause you don't know what you have  
Till your everything is gone  
You need someone to show you how to live again I wanna be there when you're feeling high  
I wanna be there when you wanna die  
I'm gonna light your fire  
I'm gonna fuel your flame I wanna be there when you go insane  
I wanna be there when you're feelin' down  
And I'll be there when your head is spinnin' 'round  
I'm gonna be your lover, gonna be your friend  
I wanna be there till the end You wouldn't know that I was there  
'Cause I have been there all the time  
And if I had my way, I'd hold you in my arms  
Leave this madness all behind 'Cause you got so much to give  
But you throw it all away  
And all you got to show for who you are is pain And I've got so much to give  
If you'd only let me in  
I'm gonna take the time to show you I'm a friend  
You'll believe in love again I wanna be there in the pouring rain  
I wanna be there when you call my name  
I'm gonna light your fire  
I'm gonna fuel your flame I wanna be there when you go insane  
I wanna be there when I'm outta town  
And when your whole damn world is crashing down  
I'm gonna be your lover, gonna be your friend  
Wanna be there till the end, yeah 'Cause you don't know what you have  
Till your everything is gone  
You need someone to show you how to live again And I got so much to give  
If you'd only let me in  
I'm gonna take the time to show you I'm a friend  
You'll believe again I wanna be there when your baby cries  
I wanna be there when they tell you lies  
I'm gonna light your fire  
I'm gonna fuel your flame I wanna be there when you go insane  
I wanna be there when your nights are long  
And when you're feeling like you don't belong  
I'm gonna be your lover, gonna be your friend

Gonna be there till the end I'm gonna be there in the morning  
I'm gonna be there in the night  
I'm gonna be your lover, gonna be your friend  
Gonna be there till the end, yeah
