In This Light

David Usher

Hey, are you asleep now?
I thought I heard you talking
'Cause they're draining out my heart
And I think I know what's coming
They can't leave this aloneMy oceans are expanding
And all us fish are drowning inside
There's pollution on the tide
And this ship of fools I'm rolling with
Can't keep me aliveBut in this light, I can see the angels
Burning from the inside out
They spread their wings to die
In this light, I can see the people
The damaged goods they take this life
It's passing byYou know that we're sinking
All your jewels are dragging us down
But I'm running out of blood, taking money over love
We can't hope to surviveSo ask me if I'm hungry
While everybody's starving inside
But the doctor's never there and this medication
Doesn't really keep me controlledBut in this light, I can see the angels
Burning from the inside out
They spread their wings to die
In this light, I can see the people
The damaged goods, they take this life
It's passing byYou, you know that I'm not that strong
No one can get out, I'm not able now
You, I know you're here to change
We all stay the same, I'm not able nowAre you asleep now?
I thought I heard you talking
'Cause they're draining out my heart
And I think I know what's coming
They can't leave this aloneBut in this light, I can see the angels
Burning from the inside out
They spread their wings to die
In this light, I can see the people
The damaged goods they take this life
It's passing byYou, you know that I'm not that strong
No one can get out, I'm not able now
You, I know you're here to change

We all stay the same, I'm not able now
I'm not able now, now
