Longest Day

Shapeshifter

Sometimes it's like the world is caving in No--
one wants to ever see us win
What do we have to do to make it through
I am in need of the strength I've found in you Cause'
These days things can get so complicatin'
No one here to even call you through it
Seems like the world weighs on the shoulder trying to hold me down
but it's time to move

That's when we got to search a little deeper
Look in rather then always looking out
Hold on to what is true and what's around you
'Cause these will be testing times
and we must go through
I know we have to keep on pushing harder
Maintain throughout all adversity
No more will these chains hold our momentum
No one can hold us now
Itâ€™s time to move

This is the longest day
I got to, got to get away
This could be the longest day
I've got to, got to go away
got to get away
got to go away
got to get away
got to run away
Time to find my strength to compose oneself to fight another day
Got to find my strength to compose oneself, come what may

got to get away
got to run away
got to get away
got to run away

got to get away
got to run away
got to get away
come what may
