

# Weed & Coffee

## Mac Lethal

[ Intro ]

Yo, uh[ Verse 1 ]

I don't drive a Bentley, or a Benz or a Beamer  
I don't drive an Audi or a Lamborghini either  
I don't push a range round town just to act paid  
Only money that i got is change in my ashtray

I don't drive a Porsche

I don't drive a rolls royce

I don't drive feraris

I don't even drive a volvo

Wanna get up in my car you have to squeeze

Because my motherfucking car is Japanese

I drive a Honda

And no sir i did not lease i bought a god damn honda

I be getting Whole Foods bitches

You be getting Olive Garden bitches with the bronzer

I own a Honda

Spent the extra money on a vaporizer for my marijuana

Grip that steering wheel

Irish boy with a mean left hand looking like Conor

Picture me rolling in a Toyota Corolla with 100,000 miles

Im a veteran nothing to play with

This one for the Nissans and Kias

And the Hyundais or Hun-dais or the however the fuck you say it  
Rappers always spending their money on these pricey ass automobiles

Looking like idiots

I'm from the midwest with enough (?)

Whether to impress

I don't want a nice car

Not even a little bit[Chorus]

All I really care about is cruising through the city  
With my windows down so back the hell up off me

All I wanna do is wake up early in the morning  
Smoke a little weed and drink some fucking coffee

YeahVerse 2

I don't ever do hard drugs

Just moderate drinking

Lately I've been trying to be sober during the weekend  
Exercising everyday for my good health

Lower the anxiety that I feel being my good self  
I don't need sweets  
I don't need fried food  
Grass fed butter in my coffee is a great brew  
Before an apple a day would keep the doctor away  
Then imagine what would happen if you ate two I used to feel the pressure  
'til i learned a couple lessons  
Living life and always stressing  
Had no answer to my question  
Started thinking about the poison  
I put up inside of my physical body  
Came to the conclusion  
Living healthy is an (?)  
I gotta have the energy  
To be a better father  
Gotta focus  
So i could put a couple dollars in a closed fist  
Smoke a little marijuana  
Never smoke cigs  
And exercise so I don't grow tits  
Lift weights  
Compound movements  
Leg day  
Deep squats  
Drop down, do it  
Build your skills and find yourself a career  
Can't be 35 still living at your mom's house stupid  
I got friends that got habits that are so bad  
I guarantee they're gonna die of a heart attack  
You gotta make choices that positively benefit you  
For fucks sake how hard is that  
[Chorus]  
All I really care about is cruising through the city  
With my windows down so back the hell up off me  
All I wanna do is wake up early in the morning  
Smoke a little weed and drink some fucking coffee  
Yeah[ Verse 3 ]  
For the first time in my life  
I can see myself with my eyes closed  
I can see the things that I hide from the world  
I can see the things that only time shows  
So what has time shown?  
Time has shown  
That every single person I have known  
Is gonna suffer everyday and die alone (2x) For the first time in my life

I can see myself with my eyes closed  
I can see the things that I hide from the world  
I can see the things that only time shows  
So what has time shown?  
Time has shown  
That every single person I have known  
Is gonna suffer everyday if they don't have weed and coffee[ Outro ]  
Uh. caffeine and weed are drugs too mac  
Shut the fuck up
