## **Seeds**

## **Alphaville**

Little darling On the factory floor Sirens are wailing They are calling you like lovers They always want moreDepartment 27 Deep down below You are piecing together The seeds of the worldAshen roses Growing darkness Starving children Someday you stand up and danceGlittering sunlight Keep on shining And put them together The seeds of the worldBinding all the flowers of the world Start bursting into millions of colors Unfold all the flags of the nations Kiss me again, let the battle startLittle darling What have you done? Hearts are breaking Live without ending Numberless menNever relaxing I have to see it all Fire, desert, cold and arid And all in a flashBinding all the flowers of the world Start bursting into millions of colors Unfold all the flags of the nations Kiss me again, let the battle start
