

# Take Her (Fiddler's Studio Sessions 1984)

## Rough Cutt

i've been back to the time when i saw her face  
you were the light above the night the queen who wins the ace  
you took me by surprise last with love and first with lies  
let the fool into the game now the fool's got another namedid you take her?  
she's a little heartbreaker  
take her away awayyou were bad i've seen it all the laughter the pain  
shelter from the storm would always stop the rain  
if i had the chance the choose between the victim and the crime  
if you dared to look away because you take your time  
just take her shake her break her  
take her shake her break her  
take her away  
take her away
