

Give Me a Try

The Wombats

I know that I like to let excess exceed
But I just need you in that fur coat
With only my necklace on underneath
And I don't care why
This apartment's always cold
London can try
It'll never swallow me whole

And I swear we could be gigantic
Everything I need
Like it on a Sunday night
This could be worth the risk
With a guarantee
This could be the drug that never bites
Just give me a try
Just give me a try
Be kinda hoping you might
Give me a try

I know sometimes I lose the plot
And I cause a scene
What do you dream of on the west coast
When my head is aching in GMT
And I don't care why
This apartments so ice cold
Let London try
It'll never swallow me whole

I'm shaving with your toothpaste
And trying to vacuum from the ceiling
The millisecond that you're away
I get the loneliest feeling

Just give me a try
