Love About Music

Gentleman Road

Get the microphones set up
and lets sing a song or two
For all my family and friends
Uncle Joe knows all the tunes

Then I see my old guitar and I hit the strings
Don't matter if it's rock, country, blues, or swing

That's what I love about music it makes people crazy
makes me wanna sing a-long with you
That's what I love about time it don't mean nothin'
When a good song is on your mind

You can drive all night with no place to go
Hit that repeat button on the stereo

That's what I love about music is the places that it takes you
Makes you wanna do it all again
Dance till light it's always ladies night
at the Park Bar & Grill

Turn the radio up that's my favorite song
A Charlie Peterson record wailing that steel guitar
Thats what I love about music

Then I see my old guitar and I hit the strings
Don't matter if it's rock, country, blues, or swing

That's what I love about music
That's what I love about music
That's what I love about music
That's what I love about music
That's what I love about it
