

# Under The Northern Star

## Amon Amarth

The icy winter is getting near  
Dark skies above us  
Biting frost is in the air  
Darkness surrounds usThe cold piercing autumn breeze  
Fills the long ships sail  
Soon the lakes and seas will freeze  
And snow will lay its veilMany years we have been away  
Many oceans we have roamed  
Now the North star guides us on our way  
As we are heading homeThe many hardships we've endured  
That brought us rich rewards  
Now the North star guides us home  
With cargo full of goldMany friends died on the way  
Only few of us survived  
But I would gladly trade them place  
In Odens hall up highThe icy winter is getting near  
Dark skies above us  
Biting frost is in the air  
Darkness surrounds usSoon the lakes and seas will freeze  
And snow will lay its trail  
And we will hope for the summer breeze  
When we can set our sails
