

Right Where You Belong

Julie Anne San Jose

Wondering where you are tonight
Maybe you're that distant star
How I want you right here by my side
Now I see your face above
Could you take me where you are
Unafraid no matter what may come[Refrain]
Waiting for the hour
Of those many nights[Chorus]
When you wake up in the storm
Trees will all be standing tall
I come to you, you'll never be alone
When your hopes fall apart
Night is cold, day is dark
I give my heart, it's right where you belong
Right where you belong
Right where you belongAnd we'll meet across the sky
So together we will fly
You're so near to me, you'll never be afar[Refrain]
Once in every hour
Of those many nights[Chorus]
When you wake up in the storm
Trees will all be standing tall
I come to you, you'll never be alone
When your hopes fall apart
Night is cold, day is dark
I give my heart, it's right where you belong
Right where you belong
Right where you belong[Refrain]
Loving every hour of those many nights[Chorus]
When you wake up in the storm
Trees will all be standing tall
I come to you, you'll never be alone
When your hopes fall apart
Night is cold, day is dark
I give my heart, it's right where you belong
Right where you belong
Right where you belong
