

Good Stuff (NYC Mix)

Newsboys

If I tell you something you need to know
I gotta back it up I gotta let it show
We can be so loud, we can write a song that makes us all proud
But without love it's just a sound Everybody show what we know
And let that good stuff flow
Everybody show what we know
And let that good stuff flow I could speak with tongues of angels
Apologetics in a slick rhetoric
Either way without love my words are dead
We have love we have forgiveness We have grace without a limit
So if it has been revealed to us
Should it not then be contagious? Everybody show what we know
And let that good stuff flow
Everybody show what we know
And let that good stuff flow We got the rhythm we got the rhyme
Print up a t-shirt throw them a line
We got the rhythm we got the rhyme
Print up a t-shirt throw them a line But without love we are nothing
But without love we are nothing
But without love we are nothing
But without love we are nothing more than Everybody show what we know
And let that good stuff flow
Everybody show what we know
And let that good stuff flow and let love flow Everybody show what we know
And let that good stuff flow and let love flow
Everybody show what we know
And let that good stuff flow
