

# Fuel

## Front 242

Standing on the surface, thinking on the malice  
Aiming at the fracture  
Moving on the surface, looking for an access  
It's revolving Standing on the surface, breaking at the surface  
Dissolve the line, dissolve the sounds  
Breaking up the movement, closer panorama  
It's revolving Go away, go away  
Go away, go away What do you want from me today?  
Going through the tunnel of another drain  
What is your purpose anyway?  
Going through the tunnel of another strain Spiral on the surface, bouncing in a lead space  
It's gyrating  
Heading for destruction, coming up the surface  
Taking on the menace, it's revolving Heading for destruction  
More destruction to destruction Feel the power What do you want from me today?  
Going through the tunnel of another drain  
What is your purpose anyway?  
Going through the tunnel of another strain Standing on the surface, thinking on the malice  
Moving on the surface, looking for an access  
It's revolving Feel the power What do you want from me today?  
Going through the tunnel of another drain What do you want from me today?  
Going through the tunnel of another drain  
What is your purpose anyway?  
Going through the tunnel of another strain
