

Redistribution of Filth

Origin

Violent history of the substance known as man
Through the annals of the universe is best described as cancer
Cells that permeate the vital organs
Greed is the only antioxidant
For what is never needed
Is all that's ever had
The porous degradation
Multiplied by the acquiring of everything
Awash in the great material continuum it shall provide
Bowing to the will of the mercantile
Navigating through the rocky chasms of desire
From have to want and back again
The redistribution of filth marks a shift in power
As those once crushed under iron fist are given control
Individual freedom and liberties are given appropriate dialogue
And the world spins on the delusional axis of peace
We're left to devolve as the world burns the same theocracy
There is no shift from greed
Peering through the opposite sides / of the spectrum
Only magnifies the view of / The rotten core
It's not a matter of opposing / Ideology / It's the fundamental
human stain
It's not a matter of opposing / Ideology / It's the fundamental human
Violent history of the substance known as man
Through the annals of the universe is best described as cancer
Cells that permeate the vital organs
Greed is the only antioxidant
For what is never needed
Is all that's ever had
The porous degradation
Multiplied by the acquiring of everything
