Hollow Drum

Laura Welsh

You know I see you
In another light
Where did the days go
When it all felt rightAnd all I know is there was fire in the room
It got cold too soon[Chorus:]
Listen to the rain
And it doesn't sound the same
And it was fun fun funThe silence in your role
We're not talking anymore
We better run run runThe way you repeat any opportunity until I come undone
It's the sound of our hearts getting louder beating like a hollow drum
Like a hollow hollow hollow drum
Like a hollow hollow hollow drumSo hold your tongue
You can't look me in the eyes
You won't remember
You won't even tryAnd all I knew is there was fire in the room
It got cold too soon[Chorus:]
It's the sound of our hearts getting louder beating like a hollow drum
Like a hollow hollow hollow drum
Like a hollow hollow hollow drum
