Can't Force Love (interlude)

Case

My love, it's been so many moments since we touched
Been so many emotions since the last time we kissed
Just can't seem to heal
The time, the pain just hides deeper in my heart
And the loneliness just keeps on growing

But I do miss you, I do, I mean it, I miss us
And I realize now that everything I did was just wrong
And you can't make a man love a woman
You damn sure can't make a woman love a man
