

# Transmutation

## Maligno

I wasn't sure if I could go that far  
But I never thought that I'd crash so hard  
Come undone, fall apart I didn't realize what I'd found  
But it hit me right when I hit the ground  
Screamed at me without a sound Straight lie to say I'm surprised  
Just totally stunned, paralyzed  
Emotionless, hypnotized Something inside of my head  
Got way too good at being bad  
Way too good at being bad In place of hope there should be fear  
There's signs and signals everywhere Transmuted information  
Transmutating the equation  
World is alluding, illusion is ruling You are denied here  
Transmutation is consuming  
Transmutate No clue what exactly occurred  
But the vision's fogged  
And the memory's blurred  
I'm hearing things I've never heard Don't know how long it's been  
But something new crawls under my skin  
Something strange creeping in Shape shift of a punished mind  
Another broken heart beating overtime  
Intertwined serpentine Full force, accelerate  
Don't hesitate  
Get away  
Gotta get away
